# BLACK SNAKE

PRODUCTIONS  
WILDLIFE DISPLAYS & EDUCATION

Black Snake Productions has been traveling around Victoria and South Australia for well over a decade bringing our range of animals and a wealth of information to thousands of people across the rural areas of southern Australia.

The very popular venomous snake safety pit and talks allow the public to learn how to safely and effectively deal with venomous snakes in day to day life and how important they are to Australia's agricultural industry.

Our mobile zoo displays are also a big hit with families, allowing them to get up close and meet crocodiles, dingoes, pythons, wallabies, owls, giant lizards and more.

We are willing to travel anywhere in Victoria and south Australia and can add a unique, fun and educational aspect to any show or field day!

"I have always found Black Snake Productions to be extremely professional and excellent presenters of wildlife education sessions. I simply cannot recommend them and their wildlife displays and demonstrations highly enough."

Licensed and with close to 20 years wildlife education Black Snake Productions is Victoria's leading provider of snake pit talks and wildlife education at events!

Black Snake Productions is fully insured.\*

## Ag Ed Quest

## Ag Ed Quest

### School Activities Program

#### Primary and Junior Schools ~ Middle and Secondary Schools

A focused fun and engaging format for all visiting schools to engage with the Field Days, meet up with ag industry partners, consider future pathways in ag and see all the latest ag machinery and technology on display at the Field Days.

**Primary Program** is designed to be completed in larger groups with teacher supervision and includes a planned itinerary including children's activities. The program includes in-school classroom activities to prepare students for the Field Days.

**Secondary Program** will include a Careers in Ag panel discussion on Tuesday and Thursday, where students will hear from a variety of Wimmera people currently working or studying in agriculture. The panel discussion will highlight the wide range of career opportunities in agriculture and the Wimmera.

#### Agriculture Students (Secondary)

Aligned with current curriculum topics, Agriculture students will receive a specific Quest that will challenge their existing knowledge and connect them with exhibitors who have a direct link to agriculture-related products and services. Designed to get students thinking and working together, this new approach to aligning the program to the current school curriculum provides real context to student's learning whilst meeting with potential employers in the region.
