President's Message

On behalf of the WMFD committee and staff, I'd like to extend a warm welcome to the 2026 Wimmera Machinery Field Days. Celebrating our 62nd year of delivering the latest Agriculture technology and innovations to farmers across Western Victoria. After an incredibly challenging start to 2025, the season did improve with the majority of farmers having a better than expected finish to the season, particularly those in the southern half of the state. We hope the field days will provide a great opportunity to reflect on the year, reconnect with old friends and build new networks.

The Committee would like to thank all our exhibitors for the time and effort that goes

into having their sites looking fantastic. We have a large range of exhibits from machinery, technology, finance, tools all the

way through to home and lifestyle. The committee would also like to thank our community groups and sponsors for their support, without them we would be unable to run such a successful event. We would also like to thank our staff for their professionalism and hard work in bringing the committees visions and ideas to life. I would like to thank all the committees and their families for the time, effort and dedication they put in throughout the year.

**Harry Young, President
Wimmera Machinery Field Days**

Manager's Message

Welcome to the 62nd Wimmera Machinery Field Days. Be on the look out for our Fantastic Farm Trucks.

We really enjoyed the display of big tractors last year, so this year we decided to bring Fantastic Farm Trucks to the field days. Thanks to everyone that assisted by bringing their trucks to the field days. Please be respectful when looking at them and remember they are private property.

Our exhibitors need the biggest recognition. Without you we wouldn't have a field day, so thank you for your continued support. To our new exhibitors, welcome to our field and I hope your time here is successful. We continually strive to make our field days a success and welcome your feedback.

Thank you to our sponsors that continue to support our field days. We value your contribution to our field day and the relationships we build with you to help you promote your business. Please show your support to our sponsors by visiting their sites and their businesses throughout the year.

We still continue to offer our small local market businesses the opportunity to showcase their products on Wednesday, on the back lawn of the office. Please come and support them and see what they have to offer.

This year has again been a very tough year in the area, with different areas affected by bushfires yet again. We would like to extend our heartfelt condolences to those that lost their houses and property during this time.

Our Ag Ed Quest, coordinated by Partners in Ag, is an important part of the field days, showcasing agriculture and technologies and the many and varied careers that the ag industry has to offer. It is always great to see so many school students at the field days, enjoying a day out, filled with fun educational activities.

We have a wide range of attractions so there is something for everyone: Black Snake reptiles and wildlife display, Rev It Up Racing simulator, Level Up Gaming, Fantastic Farm Trucks, heritage tractors, helicopter rides, mini train rides, animal nursery, kids zone, RFDS Simulator and PAW Patrol are back up on stage again on Wednesday.

Thanks to the community groups that contribute to the successful running of the field days and the many volunteers from these groups that make it possible. Running an organisation based on volunteers is becoming increasingly difficult so we commend the individuals that keep these groups going.

The Wimmera Machinery Field Days is a
2026 WIMMERA MACHINERY FIELD DAYS

member of the Association of Agricultural Field Days of Australasia (AAFDA). This is an important alliance and network of field days across Australia and New Zealand and represents more than 24,000 businesses participating across field day events. It involves almost 100,000 suppliers nationally and internationally and generate an estimated \$2 billion in immediate sales from event staging, whilst injecting \$80-100 million into rural and regional communities through local spending (accommodation, hospitality, fuel, retail, services). Field days strengthen community connection and resilience, acting as major social events for rural towns, support regional tourism, drawing interstate and international visitors to host towns and boost local economies during event weeks, with some towns experiencing their largest annual economic activity during Field Days.

Not only is the AAFDA a fantastic resource for those of us working behind the scenes, it is also a unified advocacy voice for agricultural events across Australia & New Zealand. We welcome all of our guests from other field days.

A big thank you to the volunteer WMFD Committee for their work and support to make the field days a success and to the team in the office for the dedication and commitment.

I hope you enjoy the 62nd annual Wimmera Machinery Field Days.

**Vanessa Lenehan, Manager
Wimmera Machinery Field Days**

Field Days History

A group of regional Wimmera farmers and agricultural association members formed a Machinery Field Days committee and a decision was made to host the inaugural Wimmera Machinery Field Days for two days in the first week in March in 1963 on a site provided by Longerenong Agricultural College.

There were approximately 80 exhibitors in attendance, a significant machinery demonstration program was carried out and over 3000 people visited.

It is now Victoria's longest running Field Days and Australia's premier broad acre and machinery focused event.

The Wimmera Machinery Field Days Inc is a not for profit community based organisation formed in 1962 made up of regional volunteer members from farming and agricultural industry backgrounds. The WMFD Committee has been operating the Field Days during the first week of March every year since 1963.

The Wimmera Machinery Field Days has grown to become one of Australia's largest broadacre and machinery field days and country Victoria's biggest annual event.

WimmeraEventsCentre

On behalf of Horsham Rural City Council, I am delighted to welcome you to the 62nd edition of the Wimmera Machinery Field Days.

This event is a highlight of the calendar for our agricultural community and, thanks to the incredible hard work and commitment of volunteers and staff, we are again welcoming thousands of visitors from across Victoria and interstate to three fabulous days in Longerenong.

Every year I am amazed at the innovation on display at the Field Days as exhibitors showcase their latest products, machinery and development in primary production and agribusiness.

This year we welcome more than 400 exhibitors from across Victoria, NSW and SA, ensuring another bumper trade show and a packed program for visitors near and far.

Importantly, the Wimmera Machinery Field Days are an opportunity for our farmers and wider community to make and renew social connections, and to exchange ideas, challenges and solutions in farming practice, equipment and technology.

We recognise also that there is more to farming than growing productivity and efficiency, and the Field Days offer a range of related opportunities in the Country Lifestyle and Health Hub exhibitions. There really is something for everyone here.

Congratulations to President Harry Young, the committee and staff for delivering another hugely successful event. Horsham Rural City Council is a proud supporter of the Wimmera Machinery Field Days. Please feel free to drop in for a chat at our site in the Moore Exhibition Centre.

Cr Brian Klowss
Mayor, Horsham Rural City Council

Services

Field Days Management Office

Head to the Field Days Management Office in the centre of the site and chat to the friendly staff and Field Days committee who can assist with almost everything.

ATM

ATM withdrawal service will be available located at the Main Office.

First Aid

The team from Royal Flying Doctor Service are regionally based and their professional and qualified staff are fully equipped. Medical response vehicles are on site and the Field Days First Aid station is located next to the management office.

On site each day.

Parents & Baby's

A well-equipped Family Kids Zone is situated in the Sponsors Pavillion behind the office and is operated by Green Park Kindergarten. There are activities for under 6's and a place to have a break, a change station and private feeding area.

Toilets

See the site map for locations including disabled access in the Alan Heard Pavilion. A new disabled facility is available at the Moore Exhibition Centre. Wider access/larger cubicles suited to disabled access and prams in the Country Lifestyle area east and west of the pavilion.

Food & Drink

Hot BBQ food, cold drinks and fresh sandwiches are available at kiosks around the site. The kiosks and drinks booths are all operated by local community groups. To support the community kiosks there are coffee vans, and an exciting mix of food trucks and gourmet vendors. Go to page 47 to see what's available.

Supporting the Community

The Wimmera Machinery Field Days is a not for profit community based organisation. The Field Days provides opportunities to numerous community, service groups and sporting clubs to assist with the operation of key tasks, duties and services each year. Over 300 volunteers are involved in the Field Days using it as an opportunity to raise significant funds for their respective clubs and organisations.

Community Groups involved with the Field Days this year include:

- Antwerp Tennis Club
- CFA Dooen Brigade
- Green Park Kindergarten Horsham
- Holy Trinity Lutheran College PTFA
- Horsham Miniature Railway Association
- Horsham Scouts Association
- Laharum Sports Inc
- Longerenong Agricultural College
- Minyip Murtoa Football Netball Club
- Natimuk Agricultural & Pastoral Society
- Natimuk United Football Netball Club
- Nhill Sporting Club
- Pimpinio Football Netball Club
- Taylors Lake Football Netball Club

A Community Service

The Wimmera Machinery Field Days each year provides complimentary passes to a large number of community health and aged care facilities from throughout the region enabling those patrons to visit the Field Days each year for free.

Community Exhibitor Sites at the Field Days

Each year the Field Days provides complimentary exhibitor sites and free entry to members of a large number of community based groups and essential service organisations.

Participating organisations exhibiting this year include:

- Ambulance Victoria
- Cancer Council of Victoria/Sunsmart
- Country Women's Association
- Dunmunkle Sump Oilers
- Grampians Wimmera Mallee Tourism
- Horsham Men's Shed
- Royal Flying Doctors Simulator
- The Makers Gallery & Studio
- Victoria Police
- Victoria SES
- Victoria Legal Aid – Horsham
- Wimmera Hearing Society (Free Wimmera Hearing)
- Wimmera Prostate Group

A Community Site – Wimmera Events Centre

Any surplus revenue collected from operating the Field Days each year is used directly to fund and cover costs of the operation of the annual Field Days event which is significant. Operating surplus is also directly reinvested back into the Wimmera Events Centre site. It enables the entire site to continue to be improved for a wide variety of events throughout the year for an ever increasing range of new business and community user groups needing a major events venue in the region.

Free Parcel Pick Up & Courier Service

Field Days Courier Service

Lighten your load - let us do the heavy lifting!

Purchase confidently and ease the load by having all your Field Days bargains picked up and waiting for you to load into your car by following these easy steps:

- Step 1** Ask at the Field Days office or at the exhibitor site where you purchased your goods about the parcel pick up service and for some courier dockets to tag your items.
- Step 2** Your goods once purchased will be tagged, a pick up docket will need to be taken to the Field Days office and your purchased goods will then be ready for collection from the exhibitors site.
- Step 3** Our on-site Courier Utes will pick up your purchased goods and transport them to the Field Days Courier Depot where they will be stored securely ready for pick up when you leave the Field Days.

proudly sponsored by

Note: Goods to be a maximum of 50kgs. Larger items may not be able to be transported. Confirm with management & courier operators. The Courier Depot closes at 5.30pm each day. WMFD and Courier operators will not be held responsible for goods remaining after 5.30pm

BLACK SNAKE

PRODUCTIONS
WILDLIFE DISPLAYS & EDUCATION

Black Snake Productions has been traveling around Victoria and South Australia for well over a decade bringing our range of animals and a wealth of information to thousands of people across the rural areas of southern Australia.

The very popular venomous snake safety pit and talks allow the public to learn how to safely and effectively deal with venomous snakes in day to day life and how important they are to Australia's agricultural industry.

Our mobile zoo displays are also a big hit with families, allowing them to get up close and meet crocodiles, dingoes, pythons, wallabies, owls, giant lizards and more.

We are willing to travel anywhere in Victoria and south Australia and can add a unique, fun and educational aspect to any show or field day!

"I have always found Black Snake Productions to be extremely professional and excellent presenters of wildlife education sessions. I simply cannot recommend them and their wildlife displays and demonstrations highly enough."

Licensed and with close to 20 years wildlife education Black Snake Productions is Victoria's leading provider of snake pit talks and wildlife education at events!
Black Snake Productions is fully insured.*

Ag Ed Quest

School Activities Program

Primary and Junior Schools ~ Middle and Secondary Schools

A focused fun and engaging format for all visiting schools to engage with the Field Days, meet up with ag industry partners, consider future pathways in ag and see all the latest ag machinery and technology on display at the Field Days.

Primary Program is designed to be completed in larger groups with teacher supervision and includes a planned itinerary including children's activities. The program includes in-school classroom activities to prepare students for the Field Days.

Secondary Program will include a Careers in Ag panel discussion on Tuesday and Thursday, where students will hear from a variety of Wimmera people currently working or studying in agriculture. The panel discussion will highlight the wide range of career opportunities in agriculture and the Wimmera.

Agriculture Students (Secondary)

Aligned with current curriculum topics, Agriculture students will receive a specific Quest that will challenge their existing knowledge and connect them with exhibitors who have a direct link to agriculture-related products and services. Designed to get students thinking and working together, this new approach to aligning the program to the current school curriculum provides real context to student's learning whilst meeting with potential employers in the region.

New Releases 2026

Company Name	Product Description	Site Number
A.I.gorithm	Paddock Monitor: Paddock Monitor uses satellite measurement and AI to calculate the standing feed on offer. The water content of the vegetation being pasture or crops. For cropping farms we also have developed specific technology that measures the nitrogen uptake so farmers can apply variable rates and reduce fertiliser costs. Prior to planting farmers also use the tools to measure the soil moisture to plan.	AHP
Agrifac Australia	Endurance 80: 2026 Endurance 80 Agrifac's flagship self-propelled sprayer for 2026, is designed for broadacre operations requiring high capacity, advanced technology, and efficient field productivity.	A12-19
Agroecopower	ATX R2.3: ATX R2.3 Dynamometer - is a high-precision mobile PTO dynamometer engineered for tractors, trucks, and heavy-duty machinery. Built for reliability and accuracy measuring true engine performance under real load, allowing precise power and torque analysis or work simulation in real operating conditions. Featuring advanced data logging, wireless control, instant reporting and automatic calibration.	T16-17
AGX Drone	DJI T100: The DJI Agras T100 is a powerful, large-capacity agricultural drone designed for heavy-duty spraying, spreading (seeds/fertilizer), and lifting, advanced LiDAR/radar obstacle avoidance, RTK precision, and highspeed efficiency for vast fields, replacing traditional equipment with smart automation for better safety and productivity.	B19-20
AusFarm Nutrition Products	StockMins-EweLamLac + Buffer: StockMins-EweLamLac + Buffer is a weatherproof, granular loose-lick supplement specifically designed to support pregnant and lactating ewes fed	AHP
BOSS Agriculture	GEN2 Air Cart: BOSS' all-new GEN2 Air Cart is the next evolution in precision seeding support. Engineered from the ground up with a host of performance and usability upgrades, the GEN2 delivers improved capacity, control, and operator convenience. From high-durability poly bins to advanced auger functionality and an integrated liquid tank system, every feature has been refined.	A48-53
Bruder Australia	Brüder Air Filter Cleaner: The Brüder Air Filter Cleaner is a product designed for the safe and efficient cleaning of the air filters from heavy machinery. utilizing a small air compressor, the cleaner seals the air filter, and with a rotating head, blows the dust out. The unit vibrates the filter as it cleans, to loosen particles, and features a trigger nozzle, pressure control and a new wide tip to prevent internal damage.	M2
Collab Ag	Verge Ag Semi Autonomous Routing: Verge Ag's Semi-Autonomous Routing uses the existing hardware already in growers' machinery to create optimised paths and precise headland turns that cut overlap, fuel use and compaction. Working across brands, it boosts efficiency, improves safety and delivers consistent, smarter routing for broadacre operations.	AHP
Croplands Equipment	RBR Vortex: Boasting Simplicity, Functionality, Robustness: Proudly partnering with RBR Enterprise to bring you a proven large scale Self-Propelled Sprayer to the market, keeping the ever-changing agricultural industry at the forefront of our designs. • 11,000L, 9,000L or 7,500L • Dual tank options for Optical Spot Spraying • Simplicity mechanical drive • Aluminum spray boom available in 48m, 40m & 36m • IVT Transmission option • WEED-IT Ready	B10-13
Eagle I Machinery	Horizon DSX 60-20 Gen 3 The market leading no-till disc row unit. Designed and developed with the specific aim of overcoming the challenges of seeding with a no-till disc drill, our DSX Gen 3 row unit is capable of seeding with planter level depth accuracy and consistency. This Gen 3 unit stands as the most technologically advanced on the market, setting a new standard in no-till seeding technology.	O1-4
ENCAPS - Fire Protections	HydroLock Encapsulating Agent HydroLock Encapsulating Agent is a specialised liquid concentrate formulated to rapidly encapsulate hydrocarbons at the molecular level, breaking the hydrocarbon chain to suppress odours, neutralise flammability, breakdown contamination and assist in the safe clean up of fuel and chemical spills. Ideal for poultrys, piggeries, feedlots or the transport industry. 100% biodegradable and PFAS Free.	MEC

Fast NBN® Speeds for Regional Australia

Technology is evolving and touches every aspect of our lives, from personal connections to vital services like farming, healthcare and education.

At nbn, our purpose is to elevate Australia by connecting people and powering progress. That is why we continue to invest in the nbn® network, to ensure it is future-ready and able to support Australia's growing demand for data and bandwidth.

In August 2025, nbn announced a partnership with Amazon Leo to deliver high-speed, wholesale fixed broadband using Low Earth Orbit (LEO) satellite technology within the existing nbn satellite footprint. When the nbn LEO service, powered by Amazon Leo, launches in Australia, nbn plans to offer wholesale, residential-grade LEO satellite broadband to around 42,000 premises^[1] within our existing satellite footprint in Victoria, via participating retail providers.

The nbn Fixed Wireless network is now more reliable than ever before. It is available to around 208,000 homes and businesses in Victoria and now offers improved maximum wholesale download speeds, including two new high-speed tiers to eligible premises.

And for 3 million-plus homes and businesses right across Victoria we have accelerated wholesale download and upload speeds for Fibre to the Premises (FTTP) and Hybrid Fibre Coaxial (HFC) technology, as part of our Accelerate Great program launched in September 2025.

Australian farmers and the agriculture sector are on the cusp of achieving their \$100 billion by 2030 ambition, well ahead of schedule. Investments in the nbn network can assist our farmers to deploy the technology they need to operate their business, stay connected to markets and information, and power their progress for the future.

To find out what nbn service is available at your address, visit www.nbnco.com.au/check and register for updates.

Excel Agriculture	Gyral 30-21-STR Air Seeder: Gyral 30-21-STR Air seeder Load Cells with Auto-Cal & WCM Auto-Cal: Auto-Cal feature interfaces with built-in load cells to provide precise, on-the-go calibration capability. Wireless Control Module (WCM): Takes the hassle out of catch & weigh calibrating by allowing wireless operation via WiFi on a smartphone or tablet at the Air Seeder. This eliminates trips back and forth to the tractor cab.	M16-17
Gason	Diamond Series 3340RT Air Seeder: The Diamond Series 3340RT is the largest, most advanced Air Seeder ever developed by Gason. Our 80+ year legacy of robust engineering continues with this machine. With a fully redesigned side release metering system, eight outlets (single or dual band) powered by dual blowers, and intelligent section control, this Cart delivers superior seed distribution and seamless operation under any conditions	N10-14
Goldacres	G8 Crop Cruiser Series 3: The G8 Crop Cruiser Series 3 is a high capacity, high clearance self-propelled sprayer designed in Australia for Australian farmers. The design is built on feedback from over 45 years of sprayer manufacturing experience and features technology previously unseen such as, weed detecting cameras and dual product capability to enable simultaneous application with two chemicals.	Y1-6
Grizzly	Wheel Track Renocator 2 - Full Cut: The proven grizzly wheel track renovator 2 now has a full cutout option that moves soil from in between the wheel tracks removing any lifted ground between the tracks and focusing it back into the wheel tracks.	V17-19
Handymax	Handymax Tractor: The new HandyMax HT45 is a reliable, 45HP utility tractor designed for Australian agricultural, landscaping, and light construction tasks. Offering best value for money, the HT45 features 4WD, a 3-point linkage, and PTO, supporting common attachments like slashers and post hole diggers. It's simple, easy-to-maintain design makes it the ideal workhorse for small to medium farms and contractors.	D8-10
Jaden Group	Jadan Group Unistack: Unistack 14 Bale stacker. Trailing large bale stacker with 14 bale capacity	P5-8
Jumpbooster	BoostX100: Heavy duty 12/24 volt jump starter with RFCT (Reverse Fast Charging Technology). LiFePo4 Battery Technology. Also have many other features, drop in and check the boostX100 out.	D50-51
Nhill Silos	40 Tonne Electric Lift Field Bin: 4.5 Metres wide, Fully self contained, electric press button wheel axle mechanism. One piece slide on, slide off door. No centre channel to catch grain or let water in. Safest and easiest operation for all operators	N8-9
Norton Motor Group	Ford Ranger Super Duty: A mid-sized truck that allows you to Tow 4,500kg, Carry more 4,500kg GVM, Do more with 8,000kg GCM. Up to 1,982kg Payload (single cab excluding tray) 154kW / 600Nm of Power & torque and 1,900kg / 2,800kg Gross axle weight rating (front/rear). Take it to extremes with Up to 299mm Ground clearance, 1,710mm Track width and 850mm Wading depth. The Ranger Super Duty is the ultimate work truck.	R22-25
O'Connors	Case IH AF10: AF10 is Case IH's highest horsepower combine ever in Australia, at 775 hp. It features a 20,000 L grain tank, the largest Case IH has offered in the region. Comes equipped with the longer AFXL rotor, providing 50% more separation. The unloading rate: 210 L/sec, plus a 32% larger cleaning system. Designed for broadacre farming and tailored to Australian conditions.	J1
O'Connors	New Holland CR11 - 775 hp Cursor 16 engine: Featuring a 20,000 L grain tank and Twin Clean double cleaning shoe for near zero grain loss. IntelliSense automation and IntelliSpread residue system with radar control.	J1
OctopusbotAI	Farm AI Forecasts: Octopusbot is a pioneer SaaS platform helping agribusinesses mitigate price volatility and weather risk with accurate AI forecasts. Our Farm AI Forecast product helps growers mitigate such risks by forecasting crop yields months ahead of harvest with a 95% accuracy.	AHP

Field Days Exhibitor Awards

Presentations
to all winners will
take place in the
Field Days Square
2pm Wednesday

The Wimmera Machinery Field Days prides itself on providing a showcase with a modern professional image and the very latest in agriculture machinery and technology.

To encourage exhibitors to strive for similar ideals, there are two major product awards and three site awards on offer during the Field Days.

Product Awards

- WMFD Machine of the Year
- Ag Business Innovation of the Year

Site Awards

- Best Ag Machinery Outdoor Site
- Best General Outdoor Site
- Best Alan Heard Pavilion Site
- Best Moore Exhibition Centre Site
- Best Country Lifestyle Site

Company Name	Product Description	Site Number
PBSeeds	GIA Colombo Lentil: GIA Colombo is a high yielding large lentil with the highest disease resistance package of all IMI lentils. For ascochyta blight it is rated R/MR, and for BGM rated MR/MS. The Australia NVT predicted MET yield has GIA Colombo as the highest yield of the medium and large size IMI lentils. With Jumbo 2 plant type, mid maturity and mod-good vegetative frost tolerance it is a great fit for the Wimmera	AHP
Plasma Strike	Green Lightning: Green Lightning is an on-farm nitrogen generation system that converts air, water and electricity into nitrate-rich fertiliser using plasma technology. It replaces spray water in existing passes, reduces synthetic nitrogen use, improving efficiency, and delivers on-demand nitrate-N without extra field operations or supply-chain risk.	G3
RedGum Products	RedGum 32000 SUPER HDV Lifter-Splitter: The RedGum 32000 SUPER HDV Vertical Splitter is the MOST POWERFUL SPLITTER IN ITS CLASS! This RedGum Vertical Logsplitster comes with a commercial Honda GX200 engine and has a convenient hydraulic lifting table to lift heavy logs up to the splitting area. Save your back and never lift a heavy log again! The Vertical logsplitter has a powerful splitting force of over 32000kgs.	L1
Riteway Farming Australia	Riteway Beaver Tail Tubulator: Tubulator built with the added benefit of being able to reach and fit under lower silos.	O7-8
Ryan NT - Ryan Farming Machinery	Packer Wheel: A Coil Packer Wheel that self-cleans and self closes the furrow. Made of spring steel that flexes when engaging the soil.	N19-22
Silo Upgrades	Sealable Roof Vent: Ground sealable roof vent for aerated silos.	U3
South East Marine and Motorcycles	Can-Am Defender HD1: The best Defender yet, Defender HD11 delivers rugged power for tough jobs, with the comfort and versatility to turn every ride into part work, part play—all grit, no compromise. In a word—unstoppable.	D34-35
Spraytech Australia	Optimix: A novel tank-mix compatibility agent designed to improve the stability and compatibility of agrochemical mixtures. It helps prevent issues such as crystal formation, sedimentation, and clogging in spray equipment.	K1-2
Swayn & McCabe Claas Harvest Centre	Claas Xerion 12 Tractor: The CLAAS XERION 12 is a powerful, high-horsepower tractor series with a 15.6-liter Mercedes-Benz engine and continuously variable transmission (CVT). Key features include a maximum output of up to 653 hp, high torque at low RPM, 50:50 weight distribution for maximum traction and minimal soil compaction, and a comfortable cab with advanced control systems. The series is designed for performance.	C27-36
Terricks Engineering	Core100: The Core100 is a 100-tonne lift-to-shift mother bin, engineered using advanced manufacturing for tough, efficient high-volume grain handling. Its optimised volume-to-footprint ratio and centre-balanced rocking axles make it more nimble and easier to shift. The continuous smooth-wall design boosts strength, grain flow, and clean-out, while a heavy-duty 15-inch auger delivers reliable capacity.	P9-11
Traction Ag	MF 9S: Meet the Massey Ferguson® 9S Series— The next generation of power and precision for planting, baling, and tillage. Built by farmers, for farmers, the MF 9S is engineered to cut your overall cost of ownership with unmatched reliability and fewer service requirements. Finish your fieldwork on time, hit the optimum operating window, and lower your cost per hour with a machine that works as hard as you do.	A62-76
Traction Ag	Fendt Vario 800: The new Fendt 800 Vario makes work a pleasure. Redesigned from the ground up, the Fendt 800 Vario Gen5 blends innovation and passion in every detail. With immense operational strength, maximum efficiency, impressive payload capacity, and new 360° lighting, it delivers the performance you need — day in, day out.	A62-76
Universal Trailers and Feeders	6300L Stock Feeder: Capacity of 6300L which works out at approximately 4095kg of pellets at a 65 hectolitre weight. The 6300L feeder is designed to have a higher trough at 200mm high to suit cattle and sheep and reduce selective feeding wastage.	T13-15

Premium tipper bodies engineered for the long haul

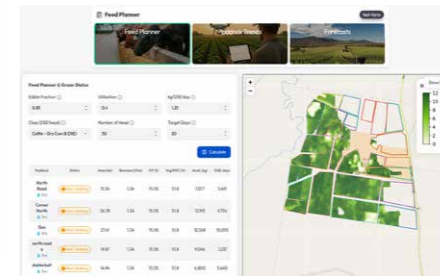

Gorski Engineering is a well-established and highly respected Australian manufacturer specialising in the design and construction of premium tipper bodies, dog trailers, semi-trailers and more. With operations spanning across Melbourne and Queensland, Gorski has built a strong national presence, supporting transport, construction, mining and waste industries with equipment engineered to perform in some of the toughest working conditions. Backed by 50 years of hands-on experience and a commitment to continuous improvement, Gorski Engineering has earned a reputation for delivering reliable, fit-for-purpose solutions tailored to each customer's operational needs.

At the core of Gorski Engineering's product range is the use of industry-leading Hardox and high-grade aluminium materials, ensuring an optimal balance of strength, durability and weight efficiency. Whether producing heavy-duty Hardox steel bodies for extreme applications or lightweight aluminium combinations designed to maximise payload and to be the last tipper standing, every build reflects Gorski's uncompromising focus on quality, safety and longevity. Manufactured locally with skilled craftsmanship and modern engineering practices, Gorski products are designed to withstand Australia's demanding conditions while delivering long-term value and performance for fleet operators nationwide.
